

Ser. No. 10/789,072

F-8140

**REMARKS**

The specification and abstract have been amended to place them in better form and/or to correct typographical errors. No new matter has been added. The amendment to the specification and abstract is substantively the same as what was filed with the June 21, 2007 Amendment After Final Rejection. As discussed between Applicants' attorney and the Examiner on July 20, 2007, and as reflected in the Notice of Allowance, the amendments to the abstract and specification were not entered because there was no explicit mention that no new matter was added. Applicants' attorney explained that the amendments were merely to correct typographical errors and to place the specification in better form by providing appropriate headings as recommended by the U.S. Patent and Trademark Office. The Examiner and Applicants' attorney agreed that an Amendment Under 37 C.F.R. §1.312 was the simplest way to place the specification and abstract in

better form. Accordingly, Applicants respectfully request that the present amendment to the specification and abstract be entered.

Respectfully submitted,
